INTIVA TOKEN

**OVERVIEW OF OUR
DECENTRALIZED CREDENTIALING
PLATFORM AND TOKEN**

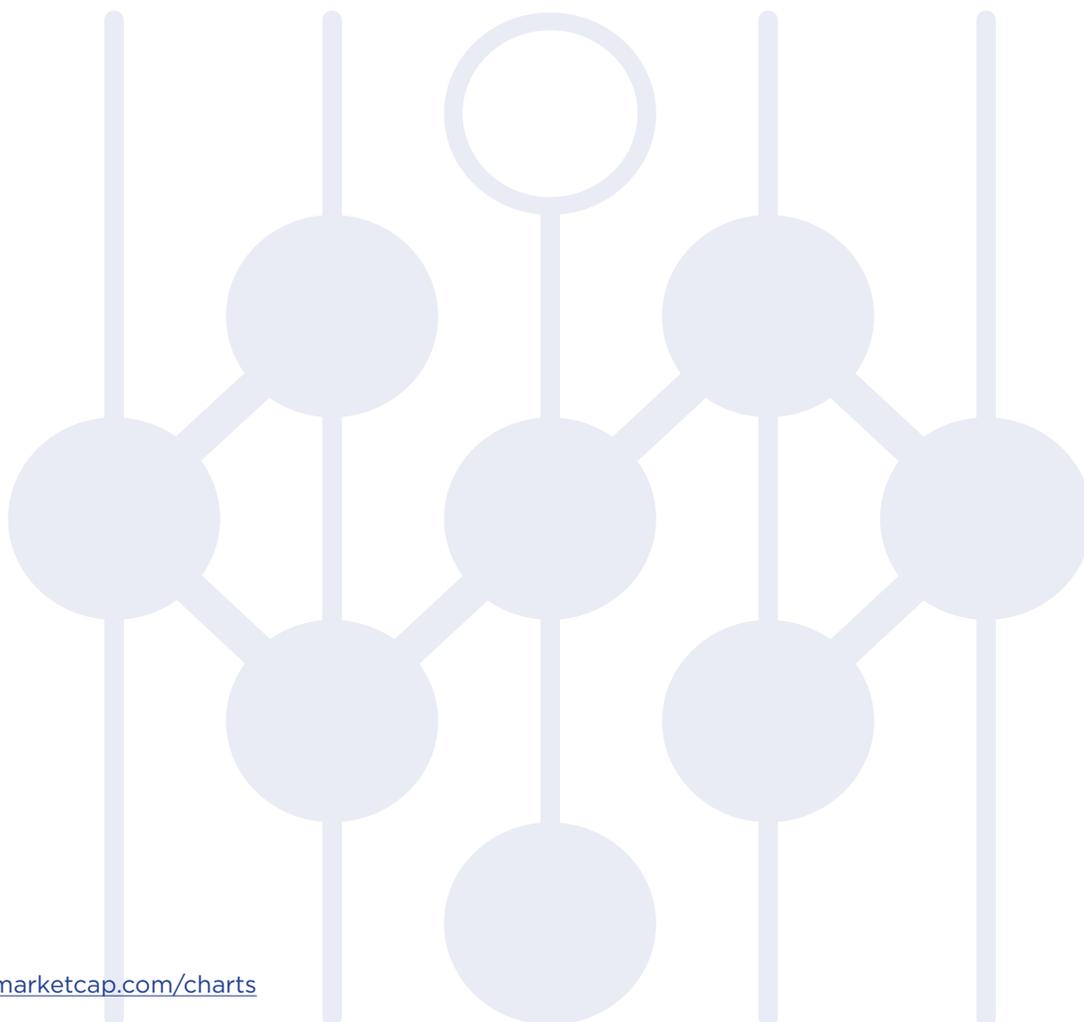

**PUBLISHED APRIL 6, 2018
VERSION 3**

ABSTRACT

Satoshi Nakamoto's Bitcoin: A Peer-to-Peer Electronic Cash System sparked a revolution that seeks to leverage distributed ledger technology and cryptocurrencies to move beyond centralized financial infrastructure. There has been progress toward reaching this goal, as evidenced by the total market capitalization of cryptocurrencies exceeding six hundred billion USD (\$600,000,000,000) in 2017, but this explosion in popularity only tells a fraction of the story. Distributed ledger technology will not only disrupt centralized financial infrastructures, but also nearly every market segment in the world.

The Intiva Health Platform (the "Platform") was built by Intiva Health, the parent company of Intiva Token Inc., to automate the administrative tasks of credential and licensure management, continuing education coursework, and discovering job opportunities for healthcare professionals. Specifically, the Platform is intended to enable healthcare professionals to organize and maintain all the documents necessary to conduct their profession in compliance with all laws and regulations applicable to healthcare professionals. The Platform captures a valuable subset of data from the highest paid group of professionals in the United States and uses that data to give healthcare professionals more control over their careers.

Certain inefficiencies in healthcare have resulted in the loss of critical productive time and billions of dollars. Intiva Token, Inc. (the "Company") can further address these concerns by integrating the revolutionary Hashgraph distributed ledger technology and a tokenized (cryptocurrency) economy, with the existing business operations of Intiva Health.

STATEMENT OF PURPOSE

This Overview (the “Overview”) is for informational purposes only and may be subject to change. This Overview intends to briefly inform prospective U.S. Investors of Shares in Intiva Token, Inc. (the “Company Shares”) (“Investors”), and prospective purchasers, who are non-U.S. Persons located outside of the United States, of Intiva Token (“NTVA”) (“Purchasers”) about the operation of Intiva Token, Inc. (hereinafter, the “Company”), the Company’s relationship with Intiva Health, the services and products offered on the Intiva Health Platform, and NTVA’s utility on the Intiva Health Platform.² There is sensitive information enclosed herein, and it is understood this Overview will be used solely for the aforementioned purpose. This Overview does not constitute an offer or solicitation of Company Shares or NTVA in any country, state, or other jurisdiction in which such an offer or solicitation is not authorized.

The information contained in this Overview is privileged, proprietary, and otherwise protected from disclosure. Each prospective Investor and Purchaser, by accepting delivery (electronically or physically) of this Overview, agrees to the foregoing and undertakes not to reproduce, in whole or in part, this Overview, or any documents relating thereto. If such prospective Investor or Purchaser does not purchase any of the Company Shares or NTVA, respectively, offered hereby or the Offering is terminated, the prospective Investor or Purchaser agrees to promptly return this Overview and all such documents to the Company, if so required by the Company. If the reader of this Overview is not the intended recipient, you are hereby notified that any dissemination, distribution, copying, or use of this Overview is strictly prohibited. If you have received this document in error, please destroy any copy thereof.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this Overview constitute forward-looking statements. All statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. When used herein, the words “may,” “will,” “continue,” “anticipate,” “intend,” “estimate,” “believe,” “expect,” “should,” “potential,” “forecast,” “project,” any variations of such words and similar expressions, or the negatives thereof are generally intended to identify forward-looking statements. Such forward-looking statements, including the intended actions and performance objectives of the Company, involve known and unknown risks, uncertainties, and other important factors that could cause the actual results, performance, or achievements of the Company to differ materially from any future results, performance, or achievements expressed or implied by such forward-looking statements. No representation or warranty is made as to future performance of such forward-looking statements. All forward-looking statements in this Overview are based on management’s beliefs, as well as assumptions made by and information available to management and speak only as of the date hereof. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement contained herein to reflect any change in its expectation with regard thereto or any change in events, conditions, or circumstances on which any such statement is based. Forward-looking statements may be about future performance including, but not limited to, the future revenues, earnings, strategies, and prospects of the

2 Note that tokens are not offered for sale to any U.S. Persons, as defined in Rule 902 of the Securities Act. Tokens may only be purchased by non-U.S. Persons located outside of the United States.

Company. Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from those anticipated. Prospective Investors and Purchasers are cautioned not to place undue reliance on these forward-looking statements in making any personal decision. Prospective Investors and Purchasers are not to construe this Overview as investment, tax, regulatory, financial, accounting, or other advice, and this Overview is not intended to provide the sole basis for any evaluation of an investment in the Company. Prior to acquiring securities in the Company, a prospective Investor or Purchaser should consult its own legal, investment, tax, accounting, and other advisors to determine the potential benefits, burdens, and other consequences of such investment.

DISCLAIMERS

This document is provided to you for your information and discussion only and does not contain all the relevant information regarding investment in the Company. It is not a solicitation or an offer to buy or sell any security or for investment purposes. The information contained herein should not be considered as personalized advice from the Company. Any information including facts, opinions, or quotations, may be condensed or summarized and is expressed as of the date of writing. The information may change without notice and the Company is under no obligation to ensure that such updates are brought to your attention. The Company reserves the right to remedy any errors that may be present in this document.

The information currently provided within this Overview does not purport to be complete and prospective Investors and Purchasers should read in detail the Company's White Paper, Offering Memorandum, and other relevant documents before investing in the Company. The information contained in this Overview was created by the Company from its own internal records and from other sources it deems to be reliable, but neither this Overview or any supplementary data purports to be inclusive. Accordingly, each prospective Investor and Purchaser is expected to conduct his/her/its own due diligence.

All investments in the Company involve a high degree of risk, volatility, and illiquidity. Purchase of NTVA involve a high degree of risk and illiquidity. Therefore, Investors and Purchasers should consult their advisors for any tax, accounting, financial, legal, or any related advice regarding investment in the Company and should not rely on the material contained herein. In no case whatsoever will the Company and/or its affiliate companies be liable to anyone for any decision made or action taken in conjunction with the information and/or statements in this document or for any related damages.

This document does not constitute an offer to sell, or a solicitation of an offer to buy, Company Shares or NTVA in any jurisdiction in which it is unlawful to make such an offer or solicitation. Neither the Offering of the Company Shares, the Sale of NTVA, this document, nor any other marketing materials have been reviewed or approved by the U.S. Securities and Exchange Commission (SEC) or any other federal, state, or foreign regulatory authority.

ORGANIZATION, BUSINESS, & PURPOSE

ORGANIZATION & CURRENT OPERATIONS

The Intiva Health Platform, developed by Practice Interactive, LLC, dba Intiva Health (hereinafter, “Intiva Health”), the parent company of Intiva Token, Inc., is the first integrative career platform that allows licensed medical professionals (“LMP”), such as Doctors of Medicine (MD), Doctors of Osteopathic Medicine (DO), Doctors of Dental Surgery (DDS), Doctors of Podiatric Medicine (DPM), Doctors of Pharmacy (PharmD), Physician Assistants (PA), Nurse Practitioners (NP), Certified Registered Nurse Anesthetists (CRNA), Certified Nurse-Midwife (CNM), Clinical Nurse Specialist (CNS), Registered Nurse (RN), and more, to manage every aspect of their career.

This includes:

- Insurance needs
- Job opportunities
- HIPAA compliant communication
- Continuing education coursework
- Credentials and licensure management

As for facilities and medical groups (“FMG”), such as hospitals, medical groups, skilled nursing facilities, urgent care clinics, home health, and more, the Intiva Health Platform will allow them to connect with LMPs to:

- Expedite the credentialing process
- Streamline recruitment efforts
- Maintain compliance

In short, the Company offers a seamless solution to relieve administrative burdens for both LMPs and FMGs. The Platform already has thousands of LMP and FMG users and this is just the beginning.

SUITE OF SOLUTIONS

The Platform's suite of solutions facilitates compliance and organization, and is free for LMPs and FMGs. The Platform also provides Key Partners with targeted access to LMPs and FMGs, while protecting the identity of users and only allowing access through expressed consent. These Key Partners are across the healthcare industry, including, but not limited to, pharmaceutical, continuing education, and professional liability companies. This suite of solutions includes:

- Intiva Careers - a unique medical career matching solution,
- Continuing Education - accredited and relevant content for LMPs,
- ReadyDoc™ - a repository to store, manage, and share credentials for LMPs & FMGs,
- Intiva Connect™ (Connect) - a HIPAA-compliant messaging & interoperability solution for FMGs,
- Marketplace - vetted and relevant healthcare products and services available for users to purchase with NTVA, such as: medical malpractice insurance, cyber risk insurance, medical device, and more,
- iGO HD™ - streaming service for interactive on-demand content pertaining to CME courses, webinars, training, product, news, and promotional material. This solution was originally designed for fan websites (e.g. music, sports etc.) to provide a unique interactive experience and fan engagement. Notable usage by Backstreet Boys 20th Anniversary Celebration.

The Intiva Health Platform is an innovative all-in-one solution for healthcare professionals who historically, have had no choice but to use disparate and outdated systems.

DATA & MONETIZATION

On the data side, the Company captures 4.5 to 5 times more unique data points than competitors.

With so many data points and services, the Company has access to 15 monetization avenues. This creates a diversified business model that no other market solution currently offers:

1. Continuing Medical Education (CME) online courses

2. Livestream CME

3. Alerts

- a. Medical Malpractice
- b. General Insurance
- c. Multiple Others

4. CV Search

5. ReadyDoc™ (API)

6. Job Posting

7. Job Bidding

8. Expert Finding

9. Promotional Video Channels (iGO HD™)

10. Medical Opinions

11. Honoraria Match

12. Sentiment Analysis

13. Fee Income Research Opportunities

14. Recruitment Services

15. Orders via Connect (labs, tests, x-rays)

BUSINESS MODEL

Intiva Health currently holds agreements with several healthcare industry partners, and as a subsidiary of Intiva Health, the Company benefits from these agreements. The goal is to bring critical tools and resources to LMPs across the United States.

These partnerships, among others, include: Arthur J. Gallagher (AJG), Cooperative of American Physicians (CAP), and continuing education content providers such as Advancing Knowledge in Healthcare (AKH), Perinatal Resources (PRI), and the National Osteoporosis Foundation (NOF) (collectively, “Key Partners”).

KEY PARTNERS INTERACT WITH LMPs IN THE FOLLOWING WAYS:

A. Sponsored Alerts. Key Partners have access to a rotation of alerts that notify LMPs on expiring documents. These alerts are delivered via text message (SMS), e-mail, and push notifications, enabling Key Partners to include sponsored alerts. Ex: Key Partners can send out sponsored alerts on insurance-related documents that are due to expire, such as malpractice insurance.

B. Referrals. The Company can provide qualified referrals to Key Partners. Ex: If a LMP is interested in a particular product or service in the Intiva Marketplace, the Company facilitates the referral by providing Key Partners with all the necessary information to deliver the service.

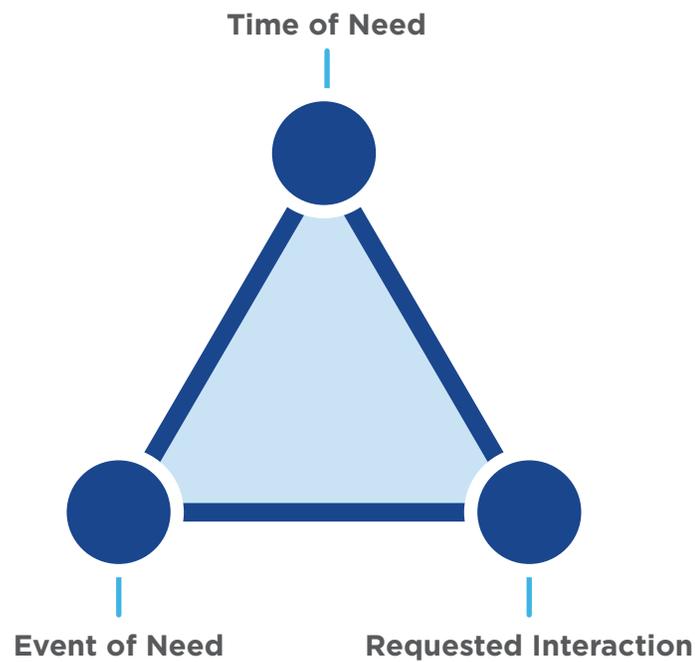

C. Grants. As a distributor of accredited continuing education content, Intiva Health is eligible to receive a portion of the grant allocated for distribution of online content by accredited continuing education content providers. Intiva Health offers this content to LMPs nationwide, and therefore continues to demonstrate increased viewership for key continuing education content providers.

D. Sales. Through agreements with Key Partners, Intiva Health directly provides products and services to LMPs and FMGs, collecting up to 50% of fees on all products and services sold through the Intiva Health marketplace. Ex: Let’s say a professional liability company was willing to pay a percentage fee for insurance written and sold. Studies show that the average medical malpractice policy equates to over \$54,000 per year per physician.³ The average commission on each policy ranges between 20%–30%. The Company receives between 30%–70% of this commission per medical malpractice policy written.

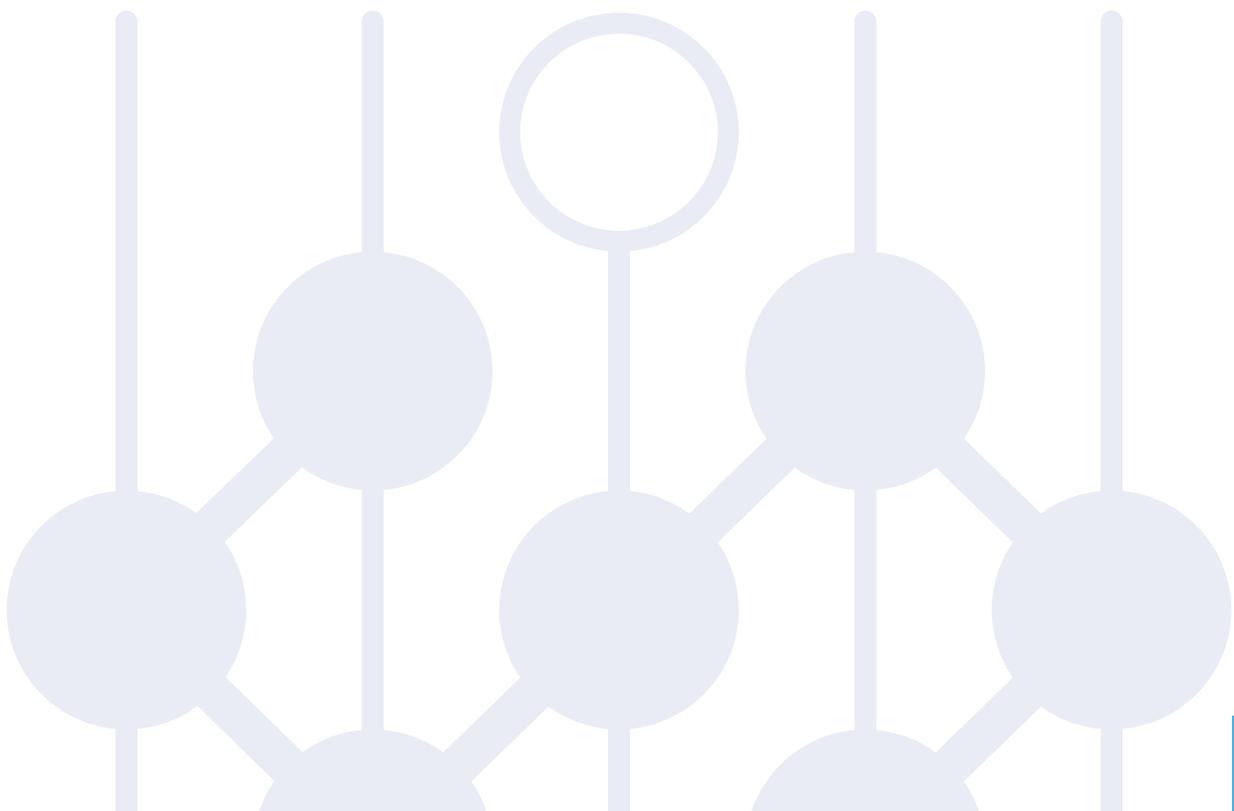

³ <https://www.gallaghermalpractice.com/blog/post/how-much-does-medical-malpractice-insurance-cost>

The Company can market in traditional ways, but also has the ability to pinpoint what medical professionals need at specific times and events. This allows for the following advantages:

- Verified access to qualified leads that coincide with the time of need (within 120 days)
- Verified access to qualified leads that coincide with the event of need (i.e., a malpractice document set to expire)
- Alerts and referrals that are requested by the LMP in advance (opted in)

The lifetime value of each deal may be in the hundreds of thousands of dollars, which is why data and timing are so important.

STRATEGIC PLAN & DISTRIBUTED LEDGER IMPLEMENTATION

Based on the existing customer base, data set, and product line, the Company is uniquely positioned to be the industry leader in healthcare data and career management platforms in what is projected to become the largest employment sector in the United States by 2022.⁴

Looking forward, the Company has recognized an opportunity to address significant issues with existing practices, particularly in LMP credentialing. Existing practices, detailed in the section entitled “Current State of Credentialing Process” below, are often entirely analog, inefficient, and wasteful. It is not uncommon for a LMP to wait several weeks to months to be granted privileges to practice with a FMG, which results in billions of dollars in financial loss, many wasted hours, and a material decrease in the quality of healthcare for patients across the industry.

Credentialing software helps, but falls critically short because of its centralized pay-to-play business model. This kind of software suffers from the following flaws:

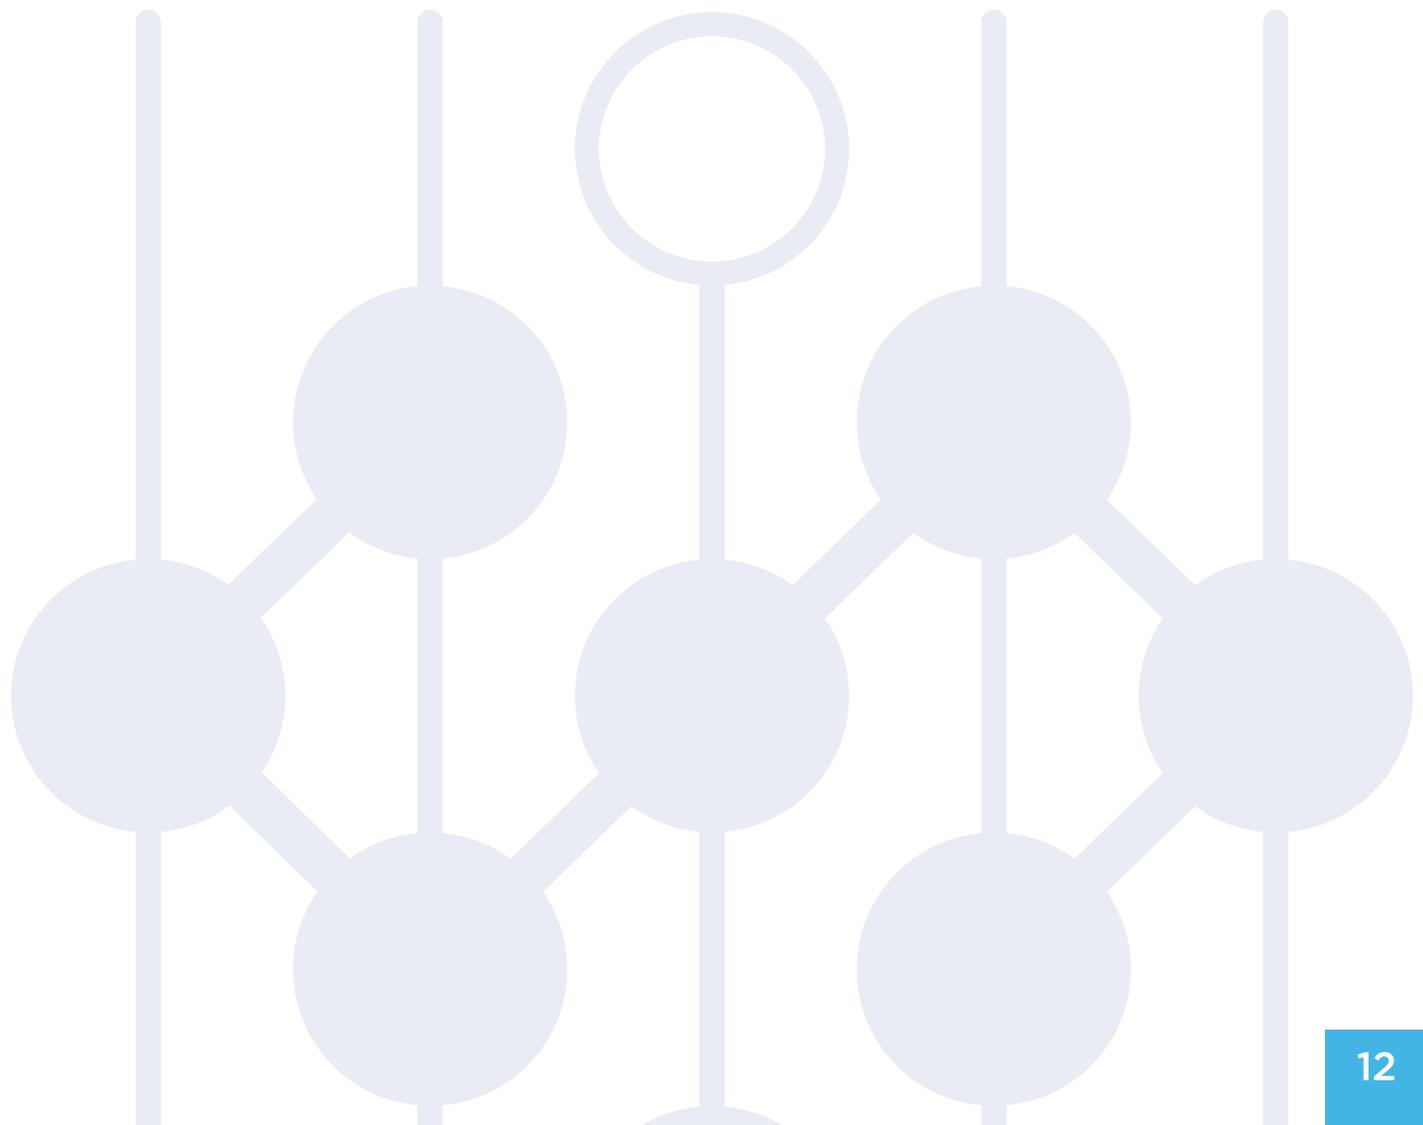

- Delays Due to Inefficiency – often requiring weeks to months to collect data;
- Reliability – the software is prone to errors and irregularities;
- Presence of Intermediaries – each with a different interpretation of facts provided;
- Lack of Security – data is centralized and often transferred in non-secured channels; and
- Ownership of LMP Data – entities own LMP data and information rather than the LMPs themselves.

4 Richard Henderson, Industry employment and output projections to 2022, Monthly Labor Review, U.S. Bureau of Labor Statistics (Dec. 2013), <https://doi.org/10.21916/mlr.2013.39>

Intiva Health is focused on addressing these breakdowns by utilizing distributed ledger technology (“DLT”) to conduct LMP credentialing processes. Applying this technology removes the pay-to-play nature of the existing process and gives facilities quicker access to information necessary to make a decision on LMP privileges. Furthermore, DLT provides the following advantages:

- A LMP will have an immutable repository of all of his or her credentials;
- Time stamped and hashed credentials will provide unparalleled security, eliminating the risk of tampering or falsification;
- Transactions within a distributed ledger will mitigate the risk of unsecured transfers of sensitive data;
- LMPs and FMGs will be able to access data for free;
- Records will be immutable and become easily verifiable; and

Existing DLTs, like blockchain, may serve some but not all of the aforementioned goals. Accordingly, Intiva Health has partnered with Swirlds, Inc. (“Swirlds”), the creator of Hashgraph technology, a revolutionary improvement in the DLT space.

WHAT IS HASHGRAPH?

Hashgraph DLT has significant advantages over traditional blockchain applications. A few significant improvements are:

- Faster transaction speeds
- Transaction order security
- Resistant to DDoS attacks
- No one can stop or delay a transaction
- Hashgraph is Asynchronous Byzantine Fault Tolerant (aBFT) and Atomicity, Consistency, Isolation, Durability (ACID) compliant.

Intiva Health is thrilled to be one of the few companies awarded a direct partnership with Swirlds to develop a Hashgraph-based platform. The Company is currently integrating Hashgraph technology and is expected to be the first market application in healthcare to utilize Hashgraph technology.

FRAGMENTATION

Before documents are written onto the Hashgraph-powered ledger, documents will be encrypted and broken into fragments for storage across the node network. Fragmentation refers to the process of splitting a file into a number of pieces before distribution. Fragmentation creates additional layers of security and privacy for every document in the system, and ensures that, in the unlikely event that a node is compromised, not a single document will be exposed.

EMERGING TECHNOLOGY

The Intiva Health Platform currently allows thousands of LMPs to manage all aspects of their career and enables FMGs to streamline recruitment and credential verification efforts. The integration of Hashgraph technology into the existing platform revolutionizes the current credentialing process, providing many benefits to Platform Users, like security, speed, and trust. This emerging technology is called ReadyDoc™.

CREDENTIALING CURRENT STATE

Currently, the verification process of a LMP's credentials is:

1 Medical providers submit credential documents to hospitals	2 Hospitals begin the verification process via phone, Internet, mail, and fax	3 Verification process is repeated for each document	4 Documents are submitted to medical staff committee for approval of privileges
--	---	--	---

The current process has quite a few issues: It's prone to human error, it may take weeks or even months, and it's dependent on centralized and corruptible storage. What healthcare professionals are left with is an unreliable, redundant, and costly verification system. Furthermore, documents can be altered, lost, and forged, resulting in an unreliable system to verify the credentials and reputation of the medical provider.

ReadyDoc™ offers a significant improvement to the current credentialing and verification process. By integrating Hashgraph distributed ledger technology, the credentialing and verification process is reduced to two-steps:

1 LMPs submit verified hashed credentials to hospitals via the Intiva Health Platform	2 Documents are submitted to medical staff committees for approval of privileges
---	--

The Platform handles this process from start to finish, providing instantaneous verification.

A LMP is likely to change jobs every 1 to 3 years and they often hold jobs at different locations. Furthermore, their career can last over 40 years, creating a need for a solution that is technologically up-to-date to meet the needs of the healthcare industry.

READYDOC™

ReadyDoc™ contains a medical provider's validated, comprehensive career history (known as a "credential file"). Built on Hashgraph technology, it's the first step toward having instantaneous verification of a provider's work history and reputation. In emergency situations, like a natural disaster, it can help healthcare facilities find qualified medical staff quickly and efficiently.

LMPs and FMGs can utilize ReadyDoc™ to input and manage provider data. There are between 15-40 documents in a credential file. ReadyDoc™ allows LMPs and FMGs to manage their credentials. A few examples of these credentials are:

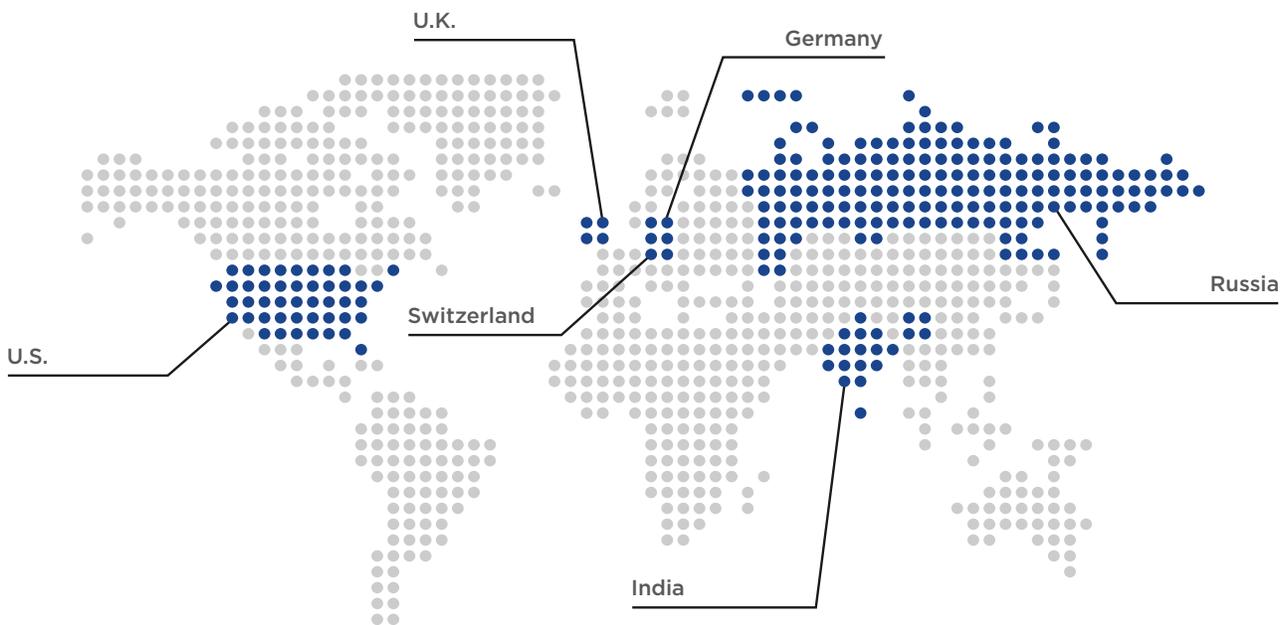

- State Medical License
- Medical School Documentation
- Postgraduate Training
- Board Certifications
- Applications
- Drug Enforcement Administration (DEA) Registration
- Life Support Certification
- Malpractice Insurance
- Sanctions Checks
- Hospital/Surgery Center Privileges
- Peer References
- Curriculum Vitae
- Government-Issued Photo Identification (ID)
- Health Documents
- Fluoroscopy Certification

THE FUTURE OF INTIVA HEALTH

The future of Intiva Health is global and expands across many industries beyond healthcare. The Intiva Health Platform solves the problem all developed countries face with regards to identification, verification, and reputation of licensed medical professionals. The Company is currently in discussions with advisors and policymakers in the UK, India, Russia, Germany, Switzerland, and more. The Intiva Health Platform translates easily into other verticals that require the identification, verification, and reputation of professionals. These verticals include but are not limited to, law, finance, insurance, real estate, engineering, construction, architecture, petroleum, agriculture, and food production. Intiva Health is highly flexible and scalable to address the unique requirements of any country, state, or municipality, and profession.

LAW 	FINANCE 	INSURANCE 	REAL ESTATE 	ENGINEERING 
CONSTRUCTION 	ARCHITECTURE 	PETROLEUM 	AGRICULTURE 	FOOD PRODUCTION 

MARKET

LICENSED MEDICAL PROFESSIONALS

- LMPs are plagued by the ongoing inefficiencies of outdated processes
- LMPs spend over 21% of their time working on non-clinical paperwork. That means giving up countless hours in billable time⁵
- Disorganized credential management tracking can lead to practice-ending lawsuits and sanctions
- Healthcare industry players, like pharmaceutical and professional liability companies, struggle to acquire accurate and verified LMP data. This results in companies wasting resources on ineffective and costly wide-net advertising and business development tactics

These credentials are held by a few central bodies which censor, curate, and control this important information with little to no capability to efficiently verify credentials.

CRYPTOCURRENCIES, TOKENS, AND DLT

The cryptocurrency market has experienced tremendous growth in recent years which has led to a leap forward in the application of DLT, providing accuracy and transparency in digital solutions. This growth is driven by improved ease of access, media attention, globalization, and distrust of centralized institutions.

Cryptocurrency and distributed ledger technology has promoted unprecedented innovation across various industries, such as financial, political, legal, supply chain, agriculture, identity and data protection, decentralized business applications, and now healthcare.

Intiva Health is capitalizing on all of the benefits that these technologies provide. Every action will be recorded, or “reinforced,” giving a transparent digital transaction trail of some of the highest paid individuals across all industries, providing even further insights into the healthcare industry.

INTIVA TOKEN (NTVA)

NTVA is the first of its kind. It serves the licensed medical professional market by offering incentives to participate in the Platform. Each time an end-user action is taken, there is a token reward, which improves the quality of data on the Intiva Health Platform.

Intiva Health's Platform is the first publicly available Hashgraph solution to incorporate a tokenized economy.

NTVA can be used to:

- Purchase goods and services on the Intiva Health Platform (like continuing medical education courses, malpractice insurance, and medical devices)
- Unlock special benefits on the Platform, like discounts and promotions
- Allow Key Partners and FMGs to access LMP data for recruitment and market insights
- Reinforce information on the Platform by providing a digital trail of transactions conducted with NTVA

Beyond use for LMP-oriented services inside the Intiva Health Platform, the Company is partnering with several foundations and charities (including the National Osteoporosis Foundation) that will accept NTVA as an official donation method. These organizations can also use NTVA to purchase sponsored impressions, recruit LMPs, promote CME courses, and drive membership.

NTVA has been developed and is intended for use on the Intiva Health Platform only. It is not intended for use as a speculative investment instrument.

ISSUANCE PLANS, TERMS, & PARTICIPATION

The Company will use NTVA to tokenize and create a token economy on the Intiva Health Platform, which will encourage engagement and reinforce, or trace, behaviors to provide a digital trail of transactions on the Platform. The Intiva Health Platform offers LMPs an all-inclusive, one-stop, highly-secured place to manage and control their careers, while also leveraging help from FMGs and offering a non-intrusive venue for companies to offer their services and products to LMPs.

Specifically, LMPs, FMGs, and Key Partners will receive NTVA as rewards for engaging in or participating in the activities on the Intiva Health Platform that qualify as “Token Events.” Key Partners can also utilize NTVA for services on the Intiva Health Platform by purchasing advertisements or searching for and recruiting LMPs.

The Intiva Token Private Sale period will be from April 19, 2018 to April 26, 2018, the NTVA Presale period will be from April 30, 2018 to May 20, 2018, and the NTVA Sale period will be from May 21, 2018 to June 17, 2018. NTVA will cost fifty cents USD (\$0.50) each, and will be discounted according to the Discount Table below. The Company intends to raise twelve million USD (\$12,000,000) from the sale of NTVA.

The Company’s Share Offering Private Sale period will be from April 19, 2018 to April 26, 2018, the Share Offering Presale period will be from April 30, 2018 to May 20, 2018, and the Share Offering Sale period will be from May 21, 2018 to June 17, 2018. Investors can invest in Company Shares at the price indicated in the chart below per Company Share. Investors in the Company Shares will receive NTVA as a shareholder benefit. The Company intends to raise twelve million USD (\$12,000,000) from the sale of Company Shares.

There is a fixed amount of one billion (1,000,000,000) NTVA, a portion of which will be distributed within thirty (30) days of the close of the NTVA Sale and the Company’s Share Sale.

*Note: Tokens are not offered for sale to any U.S. Persons, as defined in Rule 902 of the Securities Act. Tokens may only be purchased by non-U.S. Persons located outside of the United States.

LMP DISTRIBUTION

LMP's can earn NTVA for participation on the Intiva Health Platform. The Company estimates this distribution to take place over three (3) to five (5) years. Currently, there are twenty-nine (29) actions on the Intiva Health Platform for which NTVA can be earned. These actions range from claiming an account to purchasing services on the Platform. Essentially, by participating on the Intiva Health Platform through these actions, the LMP uses NTVA for his or her own use.

FMG DISTRIBUTION

Distribution of NTVA to FMGs is based upon both FMG participation on the Intiva Health Platform, and direct purchase of NTVA by FMGs who are non-U.S. Persons located outside of the United States. Twenty percent (20%) of NTVA available to FMGs will be distributed to them as rewards for participation on the Intiva Health Platform. The Company estimates NTVA will be distributed to LMPs, FMGs, and Key Partners over a three (3) to five (5) year period.

A complete user distribution walkthrough is attached as Addendum B.

DISTRIBUTION OF TOKENS

Allocation	# of Tokens	Percentage
Shareholder Benefit Offered to Investors in Intiva Token, Inc.	120,000,000	12%
Tokens Offered in the Intiva Token Sale to Purchasers ⁶	120,000,000	12%
Available for LMPs to Earn on Platform	350,000,000	35%
Available for FMGs to Earn/Buy on Platform ⁷	300,000,000	30%
Treasury/Reservers	55,000,000	5.5%
Miscellaneous	30,000,000	3%
Staff Incentives	25,000,000	2.5%
Total	1,000,000,000	100%

6 "Purchasers" are non-U.S. Persons located outside of the United States.

7 Only FMGs who are considered non-U.S. Persons and reside outside of the United States may purchase NTVA.

THE COMPANY'S SHARE OFFERING

The Offering of the Company Shares in the United States is being made pursuant to Rule 506(c) of Regulation D of the Securities Act of 1933, as amended (the "Securities Act"). Participation in this Offering is limited to "Accredited Investors" (as defined under the Securities Act). The Company will issue and provide a White Paper and Offering Memorandum that will be prepared solely for use by prospective Investors in the Company. Accredited Investors in the United States will be required to verify their Accredited Investor status.

HOW TO INVEST IN THE COMPANY OR PURCHASE NTVA

Prospective Investors can request a White Paper and Offering Memorandum from the Company, which will further outline the steps necessary to invest in the Company. Prospective Non-U.S. Purchasers can request a White Paper and Offering Memorandum from the Company, which will further outline the steps necessary to invest in NTVA.

TECHNICAL OFFERING MECHANISM

Investors and Purchasers will be asked for personally identifiable information in order to participate in the sale. The information is collected to ensure compliance with the various securities laws of the United States, as well as the Know Your Customer and Anti-Money Laundering (KYC/AML) requirements.

PARTICIPATION IN THE INTIVA TOKEN OFFERING

The Offering of NTVA is limited to non-U.S. Persons who reside outside of the United States in jurisdictions in which such an offering is permitted. NTVA are not offered for sale to any U.S. Persons, as defined in Rule 902 of the Securities Act. NTVA are intended to be used only on the Intiva Health Platform and are not intended to be sold on any secondary markets or exchanges.

*Note: The allocation of proceeds contained herein are estimates and subject to change without notice to Investors or Purchasers.

Prospective Purchasers can purchase NTVA on the Company's website. Purchasers shall purchase NTVA by wire transfer or by using a debit or credit card in the amount of the purchase. NTVA will be transferred to the Purchaser through a digital wallet within thirty (30) days from the close of the Sale. NTVA are not securities and, therefore, they do not confer any rights. Rather, NTVA are utility tokens that are only intended for use on the Intiva Health Platform.

PARTICIPATION IN THE NTVA SHARE OFFERING

The Offering of the Company's Shares in the United States is limited solely to Accredited Investors, as defined under the Securities Act. Investors will be required to represent in writing that he/she/it is an Accredited Investor under Regulation D and may also be required to provide certain documentation in support of such representation.

Once the accreditation information is verified, and the KYC and AML verification is complete, the Investor will need to confirm the investment and initiate payment. To finalize the transaction, all Investors will be required to sign a Subscription Agreement. A subscription will not be considered "accepted" until the Investor receives a duly executed copy of the Subscription Agreement from the Company. Prior to acceptance, the Company reserves the right to refuse, at its sole discretion, a subscription from any prospective Investor and/or request additional information or documentation to verify an Investor's eligibility for this Offering.

Prospective Investors in the United States can purchase shares by following instructions provided at <https://token.intivahealth.com>.

Detailed information about participation in the Intiva Token Offering and the Company's Share Offering can be found in the White Paper, Information Memorandum (for the Intiva Token Offering), and Offering Memorandum (for the Company's Share Offering).

POST-OFFERING SECURITIES COMPLIANCE & TRANSFER RESTRICTIONS

The issuance and sale of the Company Shares have not been registered under the Securities Act or any other applicable securities law, and, unless so registered, the Company Shares may not be offered, sold, pledged, or otherwise transferred, except pursuant to an exemption from, or transaction not subject to, the registration requirement of the Securities Act and any other applicable securities law. All Accredited Investors who invest in Company Shares will not be permitted to offer, sell, or otherwise transfer Company Shares until the Lock-up Period, of one (1) year from the date of purchase, lapses. After such Lock-up Period, the Accredited Investor will be permitted to sell or otherwise transfer the Company Shares subject to applicable law.

TEAM & ADVISORS

The Company is managed by its core team of executives and advisors with specific experience in healthcare, distributed ledger, and cryptocurrency technologies.

Management Team	Description
<p>Jim Comstock President and Director Major General, US Army (Retired)</p> 	<p>In January 2018, Retired Major General Jim Comstock joined as President of Intiva Health. Jim served thirty-seven (37) years in the Army, leading Special Forces groups, commanding a Supply and Service Battalion, and, most recently, serving as the Commanding General of the 311th COSCOM. In his civilian career, Jim has had over thirty-five (35) years of experience in insurance and investments. He served as the Managing Director Public with Institutional Liability Management Partners, Group and Pension Manager at Lincoln National Insurance Company, and CEO of First Fold, an organization to preserve the memory of fallen service members. Jim brings decades of operational expertise in both military and civilian settings and is an exceptional addition to the team.</p>
<p>Shawn Frasquillo Executive Vice President of Development and Support</p> 	<p>Shawn has over ten (10) years of experience in healthcare operations, from direct patient care to administration. He uses his multifaceted skill set to drive implementation and integration, as well as research and product development. He oversees all Intiva Health products ensuring delivery, service, and support. Shawn holds a Bachelor's degree in Health Information Management from Texas State University.</p>
<p>John Hartigan Executive Vice President of Strategic Development</p> 	<p>John is the Founder and President of Hartigan Industries Inc., specializing in product development, brand management, and B2B relationship opportunities and sales. As an experienced entrepreneur, John excels at and enjoys managing startup businesses, product growth cycles, and bringing innovative solutions to niche markets.</p>
<p>Garry McIntosh Chief Operating Officer and Executive Vice President of Operations</p> 	<p>Garry oversees the project management, financial planning, and administrative activities of the Company. He obtained a Masters in Business Administration (MBA) with an emphasis in Healthcare Administration, from Texas State University. He has over seven (7) years of experience managing licensed medical professionals in anesthesia, emergency medicine, and private practice settings, which provides a valuable and unique perspective to Intiva Health.</p>

Product Development Team	Description
<p data-bbox="389 240 560 316">Miles Roty Vice President of Services & Support</p> 	<p data-bbox="657 185 1242 251">Miles Roty's professional experience emphasizes over 25 years in Business Development & Account Management, Solutions/Talent Identification & Delivery in the Technology Sector.</p> <p data-bbox="657 273 1282 404">Miles began in Technology Service Delivery and Staffing in the early 1990's, with concentration in the New York City market. After co-founding a start-up technology services and staffing company in the late 1997, his business development and service delivery outreach extended to most major US markets, and the focus shifted towards more strategic IT roles and initiatives.</p> <p data-bbox="657 425 1282 556">Miles joined TxMQ in 2011 to broaden the technology service offerings for his growing client base, and accelerate the company's growth through business development, account management, operations and service delivery. Miles is instrumental in supporting customers who embrace emerging technology including Distributed Ledger and Cognitive/AI solutions.</p>
<p data-bbox="406 644 544 687">Craig Drabik Technical Lead</p> 	<p data-bbox="657 589 1282 720">Craig Drabik is a Software Architect and Engineer with over 20 years of experience. Formally Educated in Computer Science, Craig spent many years as an active developer and technical lead with a growing software company focused on UI and web development. Craig played a key role in the continued growth of that organization, which was acquired by KPMG in 2014.</p> <p data-bbox="657 742 1242 829">Throughout his tenure there, Craig architected and developed solutions primarily for large corporate clients. His responsibilities encompassed solution design, management of the full software development lifecycle, delivery and support.</p> <p data-bbox="657 851 1282 939">In 2017, Craig was identified as team lead, where he leads a technical innovation team specializing in blockchain and distributed ledger applications. Current platforms of focus include Hashgraph, Ethereum, and Hyperledger.</p>

Advisors	Description
<p>Peter Kirby Founder & Former CEO Factom Making the World's Systems Honest</p> 	<p>Peter Kirby, co-founder of Factom, is a seasoned entrepreneur. Peter has spent the past fifteen (15) years involved in numerous successful early-stage tech companies and possesses a deep knowledge of business development and community-based marketing in the technology sector. His ventures have ranged from neurological supplements and investment financing to commercial development and real estate. As a leader in the blockchain space and distributed ledger technology, Peter has led multi-million-dollar operations and was the driving force behind delivering major products to market. Peter earned his degree in biochemistry from Lehigh University in Bethlehem, Pennsylvania and later pursued his Masters in Business Administration (MBA) in Entrepreneurship from the Acton School of Business in Austin, Texas, where he graduated Summa Cum Laude.</p>
<p>Carl Buccellato Board of Directors for Ellie Mae</p> 	<p>Carl has served on the board of directors for Ellie Mae since December 1997. From May 2008 to February 2012, Carl served as chief executive officer and director of SavingStreet, LLC, an e-commerce company. Carl was a private investor and, from June 2000 to May 2002, he served as a consultant to Ultrastrip Technologies, currently known as Echosphere Technologies, an engineering, technology development, and manufacturing company. Carl was a co-founder of Homeowners Group, Inc., a real estate services company, and served as its president and chief executive officer from 1982 to 1996. Carl has served on multiple boards across various industries.</p>
<p>Steve Kerr Senior Advisor & CLO (Fmr.) for Goldman Sachs</p> 	<p>Steve is a former Sr. Advisor to Goldman Sachs, following a six (6) year term as a managing director and Goldman's Chief Learning Officer (CLO). Before joining Goldman, he was General Electric's (GE) CLO and Vice President of Corporate Leadership Development for seven (7) years, where he worked closely with Jack Welch and led GE's renowned leadership education center at Crotonville.</p> <p>Steve has also served on the business school faculties of The Ohio State University, the University of Michigan, and the University of Southern California, where he was dean of the faculty and director of the Ph.D. program. He has authored or co-authored six (6) books and more than eighty (80) journal articles.</p> <p>Steve is a member of the board of directors of Harvard Business Publishing, The Motley Fool, and the Miami Children's Hospital Foundation, and is on the advisory board of the University of Pennsylvania's program in learning leadership and the Forbes School of Business.</p>
<p>Chuck Fried President & CEO TxMQ</p> 	<p>Chuck Fried is a blogger/writer, avid triathlete, father of ten and has one grandson. Chuck's first foray into business was launching a computer manufacturer in Philadelphia. From there, he founded a company that grew into an early cloud provider at the dawn of the dot com years, which later flamed out in the spectacular way of many companies of that day. In 2000, he was hired by TxMQ company founders to lead a newly forming cloud-hosting division of the business. Within a few years, Chuck was invited to become a partner in the company, and ultimately, in 2005, became the sole owner.</p> <p>TxMQ operates in both the US and Canada, working primarily with mid-market and large customers across a wide variety of industries including middleware, data architecture, cloud integration, blockchain and hashgraph projects, planning and consulting, process improvement, and outsourcing. The company has a Salesforce practice, as well as a managed services practice helping companies more effectively manage their systems.</p>
<p>Alexander Candelario Advisor</p> 	<p>Alexander is a retired Marine Officer and former partner at a major accounting firm who understands the concept of service leadership and has an intricate understanding of financial processes. He advises all departments of Intiva Heath, including Marketing, Sales, Product Development, and Administration. Alexander holds an undergraduate degree in Accounting and a graduate degree in Business Administration (MBA) from Texas A&M University.</p>
<p>Andrew J. Chapin CEO, benjaCoin Author, Art of the ICO Advisor, Various Token Projects</p> 	<p>Andrew is the co-founder and CEO of BENJA, a merchandise advertisement platform and operator of the benjaCoin crypto-token. Through Chapin Labs, Andrew has advised several projects in blockchain and cryptocurrency, including ETHLend and BestMeta. Previously, Andrew coordinated revenue and growth for Feathr as the Vice President of Business Development and has also coordinated sales, marketing, and user acquisition efforts at Microsoft and Color Labs.</p>
